RESEARCH INTERESTS

Banking, Monetary Policy, Empirical Finance, Macro-Finance

RESEARCH

"The Real Effects of Funding for Lending: Evidence from the European Central Bank's Targeted Longer-Term Refinancing Operations ", Job Market Paper

This paper studies the real effects of funding-for-lending programmes using the ECB's Targeted Longer-Term Refinancing Operations. Combining bank and firm-level data across 14 euro-area countries, I find that increased central bank borrowing expands bank lending and firms' debt and deposits, but does not stimulate investment, highlighting the limits of targeted funding programmes.

"A Two-Tier System for the Remuneration of Banks' Excess Reserves ", Working Paper

This paper examines the ECB's two-tier system for remunerating banks' excess reserves. Using a New Keynesian model with bank capital constraints, I find that tiering strengthens monetary policy transmission under negative interest rates by relaxing banks' capital constraints, increasing lending, output, and inflation. However, it also reduces household consumption, revealing a policy trade-off.

"The Effects of Quantitative Easing and Tightening on Bank Balance Sheets ", Working Paper

This paper examines the effects of quantitative easing and tightening on banks' balance sheets and liquidity risk. Using Spanish bank-level data, I find that both borrowed and non-borrowed reserves are associated with deposit growth, particularly among non-bank financial institutions. The findings highlight the role of deposit composition and asymmetries between QE and QT in shaping liquidity risk.

RESEARCH ASSISTANCE EXPERIENCE

CEMFI, Madrid, Research Assistant for **Rafael Repullo** 2023–2026

CEMFI, Madrid, Summer Research Assistant for **Diego Puga** 2022

Bocconi University, Milan, Research Assistant for **Carlo Altomonte, Gianmarco Ottaviano** and **Tommaso Sonno** 2020-2021

Bocconi University, Milan, Research Assistant for **Barbara Rindi** 2018

Teaching

Economics of Banking (graduate) 2023, 2024, 2025
TA to Javier Suarez (2023 and 2025) and David Martinez-Miera (2024) CEMFI

Corporate Finance (graduate) 2024, 2025
TA to Nicolas Serrano-Velarde (2024) and Javier Suarez (2025) CEMFI

Machine Learning in Finance (summer school) 2025
TA to Ansgar Walther CEMFI

Conferences and Seminars

CEMFI PhD Workshop 2023, 2024, 2025, 2026

European Winter Meeting of the Econometric Society (EWMES) (forthcoming) 2026

Scholarships and Awards

FPI Grant 2023–present
PREP2022-000868

María de Maeztu, Unit of Excellence Research Grant 2021-2023
CEMFI MDM-2016-0684 and CEMFI CEX2020-001104-M

Bocconi Merit Award 2018-2021
Full tuition waiver based on academic merit
